

Biomedical Engineering Summer Internship Program (BESIP)

In a partnership of the National Institutes of Health (NIH), the Foundation for the National Institutes of Health, and the Whitaker Foundation, a Biomedical Engineering Summer Internship Program (BESIP) is being offered at the NIH. This ten week summer program (June 7 and August 13, 2004) allows undergraduate biomedical engineering students to participate, under the mentorship of world class scientists in cutting edge biomedical research projects in NIH laboratories in Bethesda, Maryland. Please note: the BESIP is separate program from the NIH Summer Internship Program (SIP) in Biomedical Research.

Academic Level

Undergraduate
