

Abbott Laboratories Internship Program

Abbott's Internship Program is rated one of the best internship programs in the country according to The Best 109 Internships, published by the Princeton Review. As an intern, you will be given an opportunity to work with Abbott's innovative technology as well as to network both socially and professionally through organized activities. Compensation is competitive, and relocation and housing assistance may also be available.

Students must have completed at least one year of college and must be enrolled in school the fall season following the potential internship. Our program averages over 250 students each year across the United States within the fields of science, finance/accounting, information technology, engineering and sales.

Academic Level

Undergraduate

Field(s) of Study

STEM, Medicine, Business
