

Tau Beta Pi Fellowships

Tau Beta Pi, the national engineering honor society, offers Fellowships for the advancement of engineering education and the profession. A distinguishing feature of Tau Beta Pi fellowships has always been that they are as free of binding rules as possible. Many other fellowships are designated for some specific purpose, making it difficult for students with original ideas to find one exactly fitted to their needs. Tau Beta Pi fellows are free to do graduate work in any field which will enable them to contribute to the engineering profession. The only specific duty of awardees is to write a report at the completion of the fellowship year summarizing their work.
