

Fellowships & Scholarships

Nationally competitive fellowships, scholarships and grants are selective awards that provide financial and professional support toward a variety of ends.

Such awards are available for research, graduate school, internships, international study, conference funding, or completion of your undergraduate education. They may be undertaken in the United States or abroad, and they may be for a summer, an academic year, or longer. Some fellowships support non-academic activities.

First, reflection will help you to identify your interests. Next, research will help you identify fellowships or scholarships designed to support those interests. Each funding source has its own style and purpose. The more concrete you are about the experience you want, the easier your search will be. A good place to begin is [Things to Consider Before Applying for Fellowships](#).

Winning a major fellowship is a great honor that can open many other doors to new experiences, institutions, and colleagues. Whatever your personal and professional goals, fellowships are worth the time and effort required for their pursuit. Whether or not you receive an award, you will emerge from the fellowship application process with a stronger sense of who you are, and a clearer vision of what you want to do.

Please note, many nationally competitive fellowships and scholarships require that the applicant have at least a 3.4 GPA; be a United States citizen or permanent resident; and be actively involved in leadership activities. It is important to please be aware that scholarship and fellowship availability is subject to change at any time. Should you have questions regarding eligibility criteria, please contact Hallie Johnson.

Award Winners
