

# National Network for Environmental Management Studies (NNEMS) Fellowships

NNEMS is a comprehensive fellowship program managed by EPA's Office of Environmental Education. The purpose of the NNEMS Program is to provide students with practical research opportunities and experiences. Each participating headquarters or regional office develops and sponsors projects for student research. The projects are narrow in scope to allow the student to complete the research by working full-time during the summer and/or part-time during the school year. Research fellowships are available in Environmental Policy, Regulation, and Law; Environmental Management and Administration; Environmental Science; Public Relations and Communications; and Computer Programming and Development.
