Pursue Your Passion

Robbie Oleynick '24 integrates tech with music in the theatre.

Find Your Niche

Sustainability

On our campus, in our community, and around the world.

A Feast for the Senses

Those featured in the Spring 2025 WPI Journal are using the senses to enhance the world around them—whether that world is real or imaginary. Kate Olguin '20 transports gamers into new worlds with immersive visual and auditory storytelling; Dan Sullivan '77 uses his engineering background to advance how people make, learn, and listen to music; and researchers at the User Experience and Decision Making Laboratory are tracking eye gazes to assess chronic pain and anxiety. Also in this issue, read about the decades-long quest of Christian North '26 to work for NASA; how students at the Hawaii Global Project Center are digging into the culture of the Aloha State; how the Global Projects Program has

evolved over 50 years; and why Assistant Professor of Teaching Katherine Foo has a stuffed wombat in her office.
